

1.a)

1.b)

Yarı Güç Band Genişliği: 2.206 Hz

Noise Equivalent Band Genişliği: 3.9276 Hz

null-to-null Band Genişliği: Herhangi bir cevaba varamadım.

%99 Band Genişliği: 52.4520 Hz

Absolute Band Genişliği: Herhangi bir cevaba varamadım.

Çözümler için hazırladığım MATLAB Kodum Aşağıda belirtilmiştir:

```
close all;

fs = 1000;

t = -10:1/fs:10;

rt = cos(40*pi*t)./(1+100*t.^2);

plot(t,rt)

title("R(τ)")

xlabel("τ (sn)")

axis([-2 2 -1.1 1.1])

figure;

N = length(t);

f = linspace(-fs/2, fs/2, N);

windowf = f(:,end);

gf = pi/20 * (exp((-2*pi*abs(f-20))/10)+exp((-2*pi*abs(f+20))/10));

plot(f, abs(gf));
```

```
axis([-40 40 -0.01 0.18]);
```

```
title("|G(f)|");
```

```
xlabel("f (Hz)");
```

```
ylabel("|G(f)|");
```

```
figure
```

```
powerbw(gf,f)
```

```
axis([-30 30 0 12])
```

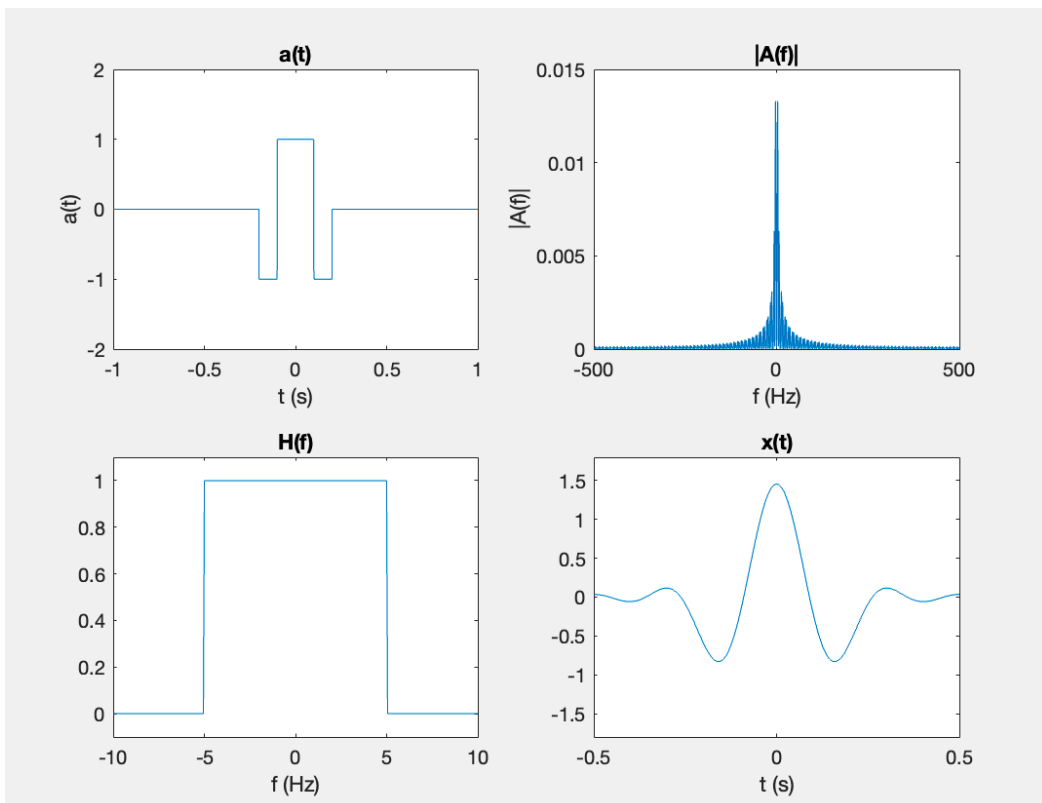

```
figure;
```

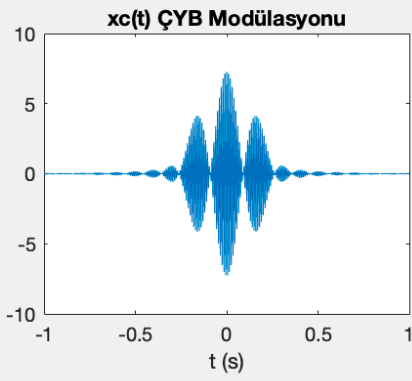

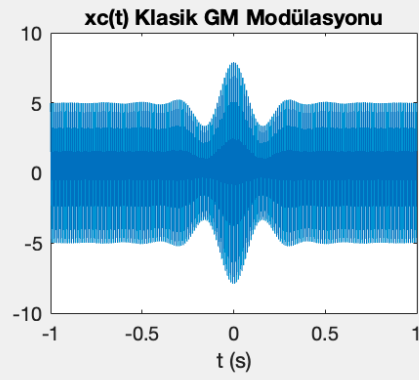

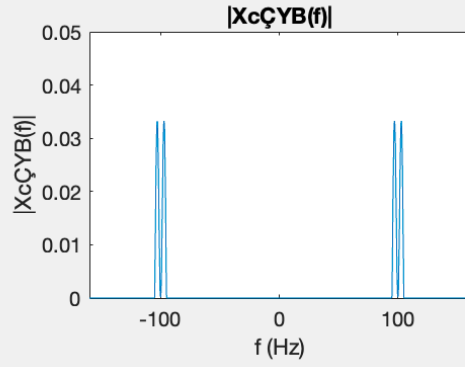

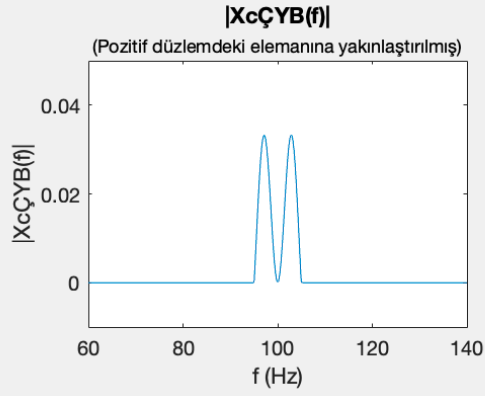

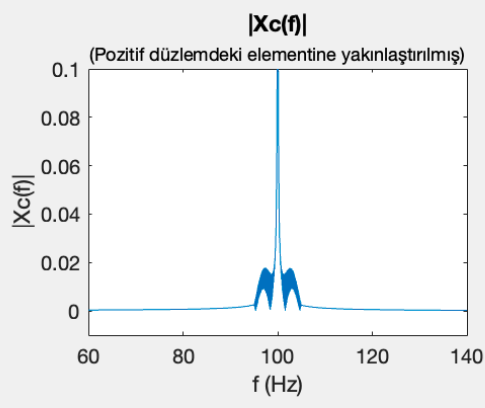

```
enbw(gf,fs)
```

```
obw(gf,f)
```

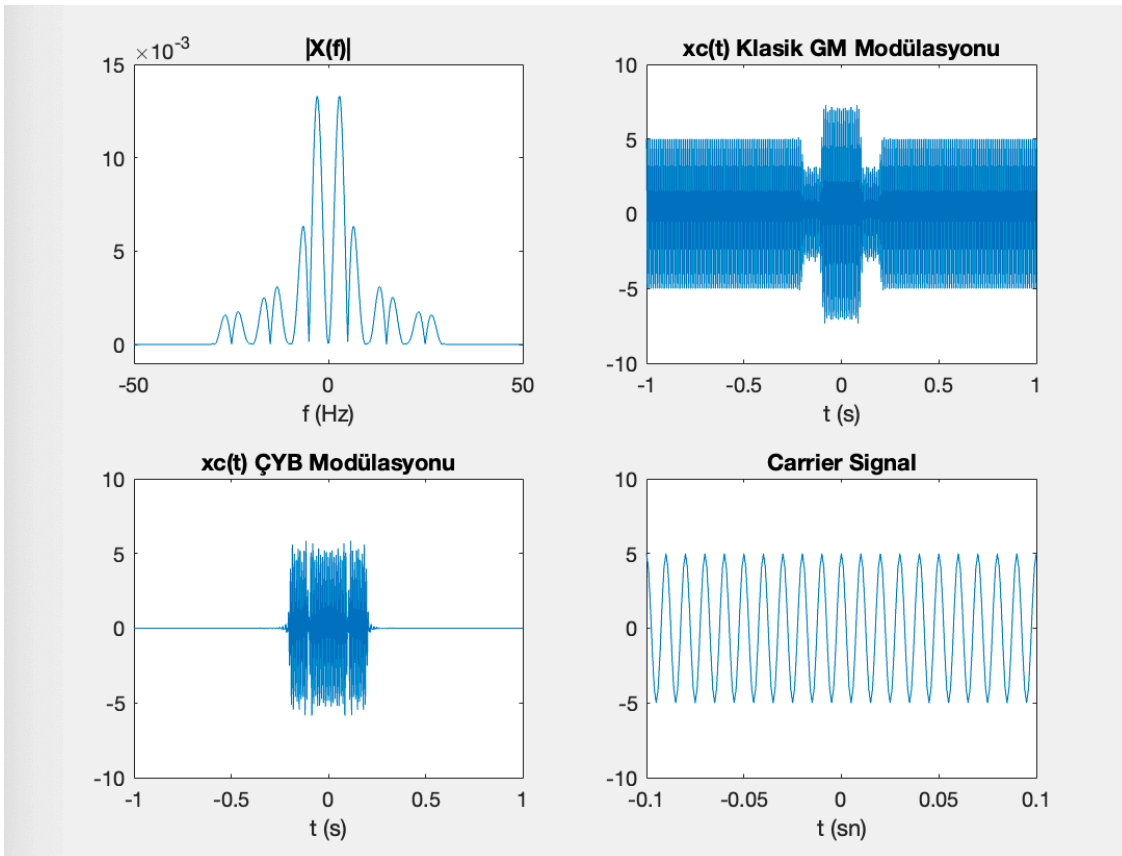

```
axis([-50 50 -0.1 11])
```

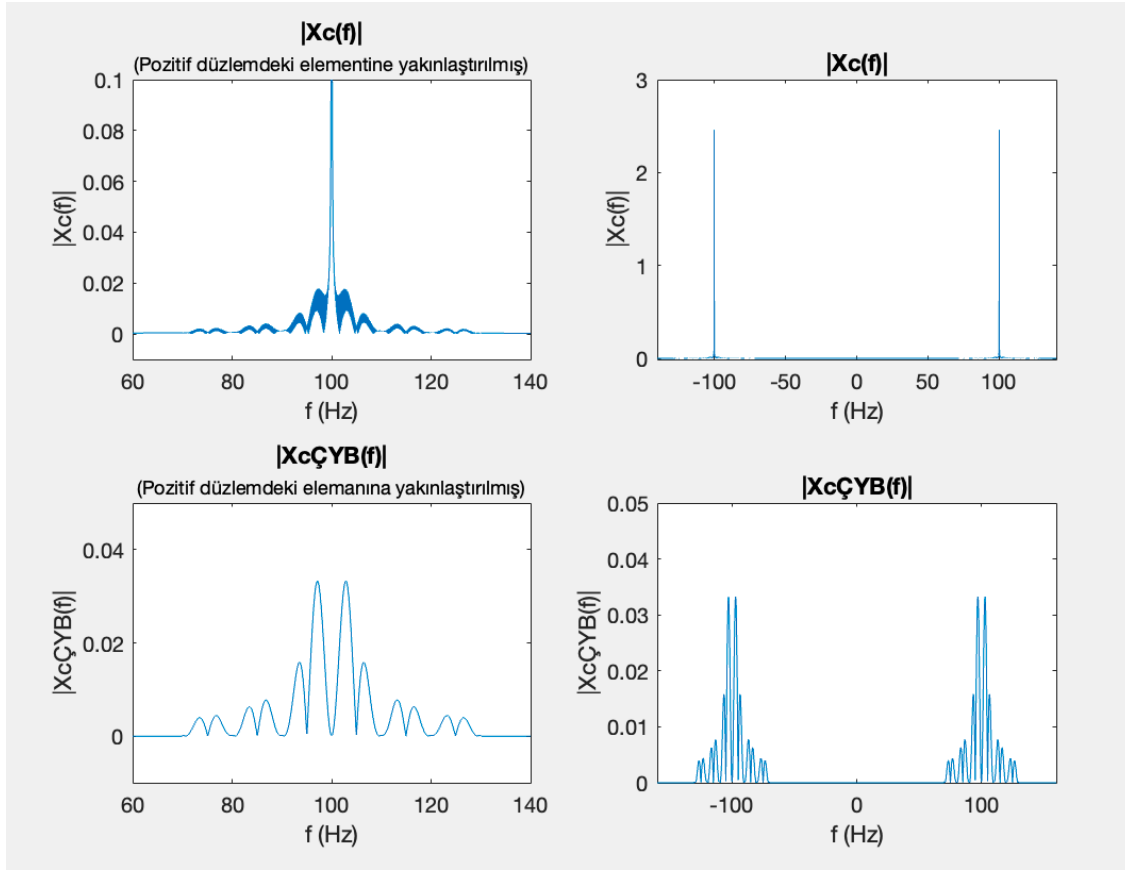

2) İkinci sorudaki $b=5$ değerleri için bulduğum sonuçlar aşağıdaki gibidir:

b=30 değerleri için aşağıdaki gibidir:

Çözümler için hazırladığım MATLAB Kodum Aşağıda belirtilmiştir:

```
close all;

fs = 1000;

t = -10:1/fs:10;

at = -1*(t >= -0.2) + 2*(t >= -0.1) - 2*(t >= 0.1) + 1*(t >= 0.2);

subplot(2,2,1);

plot(t, at);

axis([-1 1 -2 2]);

title("a(t)");

xlabel("t (s)");

ylabel("a(t)");
```

```

N = length(t);
f = linspace(-fs/2, fs/2, N);
af = fftshift(fft(at))/N;

subplot(2,2,2);
plot(f, abs(af));
title("|A(f)|");
xlabel("f (Hz)");
ylabel("|A(f)|");
